Stalwart Labs Ltd engages the following sub-processors to support the delivery of paid services. The list is provided for transparency and is updated when sub-processors are added, removed, or replaced.

Sub-processor	Purpose	Location	Data categories
Stripe, Inc.	Payment processing for Enterprise license fees and other paid subscriptions	EU / US	Billing details (name, email, payment method, billing address)
Hosting partner for Stalwart Enterprise Cloud (TBD)	Customer mailbox hosting for the Stalwart Enterprise Cloud service when it launches	TBD (EU / US options)	Mailbox content, metadata, authentication credentials
Email-deliverability partner (TBD)	Outbound mail relay for the Stalwart Enterprise Cloud service, where used	TBD	Outbound message metadata

Services operated in-house (no sub-processor)

The following Stalwart Labs Ltd services are operated in-house from infrastructure in the United Kingdom and do not currently rely on a third-party sub-processor for the underlying processing:

- the marketing site, documentation, and blog at **stalw.art** (served via a content delivery network for static delivery, no personal data of visitors is processed beyond standard server logs);
- the Licensing Portal at **license.stalw.art** (account, subscription, and invoice management);
- the Support Portal at **support.stalw.art** (community forum and private priority-support tickets).

The live, authoritative version of this list is published on this page and is updated whenever sub-processors change. Enterprise and Stalwart Enterprise Cloud customers may request notification of material changes as part of their DPA.
